

CORPORATE TREASURY & FX HEDGING POLICY

1. Base Exchange Rates (Q3 2026):

- EUR = 1.10 USD
- JPY = 0.007 USD
- XDR (IMF Basket) = 1.35 USD

2. Entity Tax Liabilities:

- OmegaCorp: 10%
- SigmaLLC: 8%
- ApexCorp: 5% (EXCEPTION: ApexCorp 'Dividend' transactions are taxed at 15%)
- Divested_Entity: 0% (Fully Tax Exempt) *(Note: Calculate Base USD Cost, then calculate Tax based on that Base USD. Final Cost = Base USD + Tax).*

3. Wholesale FX Exception: If a transaction exceeds 10,000,000 JPY, you must Base64-decode the Approval_Token. If the decoded token ends with the exact string "-WHS", you must use the Wholesale JPY rate of 0.006 USD instead of the standard rate.

4. Executive Tax Exemption: If the Base64-decoded Approval_Token starts with "EXEC-", the transaction is EXEMPT from all entity taxes (Tax = 0%), completely overriding the standard liability table in Section 2.
