

Q3 TREASURY MANDATE

1. Cryptographic Tokens: The Auth_Token column is encrypted. To decrypt: Reverse the entire string backwards, then Base64-decode it.

- If the decrypted token contains the tag [PRIME], you must use the Prime FX rate for that currency (if a Prime rate exists). Otherwise, use the standard rate. **2. Entity Base Taxes:** Entity tax rates are dynamically assigned per quarter based on the Entity_Tier_Matrix.jpg.
- A **Blue Circle** indicates a Tier 1 entity (5% Tax on Base USD).
- A **Red Triangle** indicates a Tier 3 entity (20% Tax on Base USD). (*Subtotal = Base USD + Tax*).
